From the Observer, New York, August 18, 1850. DOMESTIC CABINET MENDER.-It is one of the marvels of the age that such wast snins are expended in getting up apparently trifling articles; and another marvel that these are of so much utility. Large fortunes have been made out of matches, which are sold at the rate of one or two hundred for a penny. Somewhat similar, we are told, is to be the success of a recent invention for repairing all kinds of furniture,-"Spalding's Prepared Glue." It is prepared chemically, will keep in all climates, may be applied on the instant, and if all that is said of it is true, must become highly useful in repairing broken furniture, dilapidated books, and indeed in all cases where glue is usually applied

to building a line of railway from Cincinnati to Nashville. We regard this as a good move, and in the right direction. We can state the part of some, whilst a lack of nerve was displayfrom recollection, that a charter was obtained monks of the San Bernard. If somebody will ed by others. It is consequently unusually difficult to acquire an exact impression of the condition of The sales foot up larger, as reported-4,147 bbl.-

> he market is doubtless attributable to the still dubione course of the trace in New York, and the uncerainty which still exists as to the probable export demand. These circumstances keep speculative opera-ters in an urd and a litude, yet sufficiently nervous doing much. It may certainly be said that the shipping demand has not been heavy to-day, and that those eneaged in supplying a regular large order trade save not a heavy supply of orders at the current standard of prices. As an indication of the working of the ma.ket, superfine Flour, said to be even grades, sold at \$5 and \$5,25. This condition of things seems to bear evidence of an under current.
>
> Fransactions in Grain were large, covering, as reported, over 6,000 bush. Wheat, at \$1,08,21,10 for red. and \$1,13,21,18 for white. The market is strong and prices firmly maintained at a standard of \$1,10 for prime red and \$1,15,61,29 for white, the latter for

strictly prime or choice. Corn continues firm at 45c., though it seems that distillers pay it more reluctantly.

Outs were in much better demand and the reported Whisky dropped Me. Wigallon in the morning, b t showd strong symptoms of recovery in the atternoon, under the influence of the New York telegraph report

of the market. The condition of the provision market does not vary much. There is about enquiry enough to develop what sort of temper governs the holders, but it seems not to be of an operating kind, the less so as sellers are not discosed to volunteer concessions that will induce any trade other than such as is flowing hither quietly and naturally.

A neir demand exists for Bacon Sides at 12%c; a sale is said to have been m de of 2) hhds at 11%c, and the same figure was offered, without getting the article, holders being firm at 12c. Cear Sides were in good request, 13%c is now generally declined and holders are firm at 13%c—in some instances they are asking 13%c. quietly and naturally. Other articles remain nominally unchanged. 5,000 ead of Stock Hogs were sold at \$5,75 per cental, and

\$6,50 was offered for good Hogs early December de-livery but declined. Louisville Market. LOUISVILLE, Sept. 7, 1860.

The Cranberry Crop ln Minnesota. This valuable crop comes near being a failure this season in Minnesota. In the Northern part of the State, from which we depend upon most for a yield, we are informed by a genileman who has been prosoccurg for these berries, that the late frosts has al most entirely destroyed them. In the Western part, they are not so much affected, and will yield a fair average of previous years. These accounts rather conflict with previous reports, which were that an bundant crop might be expected .-- St. Paul Pioneer

The IRON being absorbed by the blood, and thus circulating through the whole system, no part of the body can escape their truly wonder. ful influence. ful influence.

The experience of thousands daily proves that no preparation of Iron can for a moment be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise aickly complexions indicate its necessity in al-most every conceivable case. In all cases of female debility (fluor albus, chlorosis, etc.), its effects are delightfully renovating. No remedy has ever been discovered, in the whole history of medicine, which exerts such prompt, happy, and fully restorative effects. Good appetite, com-plete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediately follow its use.
